The Company

The Company

LMA was established in 1995 in the heart of Vale do Ave to take advantage of the knowledge accumulated over countless generations. It has become a high-end textile industry in the international scene, and distinguishes itself for the constant development and production of knitted and synthetic fibre fabrics with multiple functionalities and high levels of quality.

We add our vision for the future of the textile industry to the ancestral knowledge that the Vale do Ave tradition lends us.

ECO Certified Company

Our company “LMA – Leandro Manuel Araújo”, knows and follows the European rules and statements of REACH.

We don't import materials and substances outside European Union and all of our Suppliers are well advised to follow the REACH regarding registration and forbidden substances or when limit percentages are exceeded.

This is the recognition of the constant process of development and improvement that our organization undergoes. It is a determining factor that enables us to compete more fully and capably in relation to the products and services that we provide to our clients.

As a company, it allows us to be increasingly seen as a place of personal and professional fulfilment for all our staff.

It is our policy to only work with OKO-TEX certified companies, and we can send copies of their certifications, if required.

Regarding this, we declare that the fabrics supplied by LMA, are free of forbidden substances or, are under the limits established by law

A photograph of a man and a young boy canoeing on a river. The boy is in the foreground, smiling at the camera, wearing a blue and orange life jacket. The man is in the background, wearing a green long-sleeved shirt, a black life jacket, and sunglasses, holding a yellow paddle. They are in a wooden canoe with orange gear bags inside. The river has white water rapids, and the background is a dense forest of evergreen trees.

Comfort for cool emotions.

A photograph showing a row of firefighter uniforms hanging on a wall. The uniforms are dark blue or black with prominent yellow reflective stripes on the sleeves and legs. One uniform on the right has a yellow patch with the word "WEHR" in black letters. Above the uniforms, several fire helmets are hanging. On the floor in front of the uniforms are several pairs of black rubber boots. The scene is set in what appears to be a fire station or a storage room for emergency services.

Due to its Design Office and Quality Control Laboratory, LMA is able to meet all our clients' needs and to keep pace with the latest trends in the fashion world.

This knowledge is allied to the production of technical synthetic-fibre woven fabric and knitwear.

The products are enhanced as a result of treatments and finishing that not only improves comfort-levels but also quality of life.
