IESS IN LUXEMBOURG?

................

LET'S MAKE IT HAPPEN

5

.

LU ET'S MAKE IT HAPPEN

OPEN RELIABLE DYNAMIC

Luxembourg is a world-renowned international business location and a secure and reliable hub for cross-border activities in a number of fields, including finance, logistics, the automotive sector, ICT, life sciences and clean technologies. The country is situated at the heart of several major EU markets. Global players of all sizes use Luxembourg as a gateway to Europe and beyond, benefiting from its closeness to decision-making centres and its excellent access to worldwide markets.

Luxembourg is known for its economic and political stability as well as for its strong longterm growth prospects. One reason for its success is its ability to react quickly to new opportunities. It is the first country in the world to embrace Jeremy Rifkin's blueprint for a third industrial revolution designed to ensure a resilient and sustainable economy by 2050, thanks to a fully interconnected ecosystem encompassing intelligent transport, renewable energy and new communications technology. It is also at the forefront of integrating the principles of the circular economy into public procurement procedures. Its financial services industry leads the world in the listing of green bonds and is first in establishing itself as a hub for climate finance.

Already a global leader in satellite communications and broadcasting, Luxembourg has taken an audacious step towards becoming a major player in the management and use of space resources for the benefit of humankind. Building on decade-long experience in mining, finance and space, the country has developed a suitable legal framework to allow this to happen.

This characteristic openness and willingness to test new innovative solutions, as well as the diversity of its population and physical environments, make Luxembourg an attractive "living lab" to develop new products and services.

A UNIQUELY ATTRACTIVE BUSINESS ENVIRONMENT

Doing business in Luxembourg is simple. Successive governments willing to dialogue with companies have developed a favorable legal and regulatory environment. State-of-theart infrastructures, excellent connectivity to markets and a strong reputation for commercial and political neutrality make Luxembourg an ideal place for international business to grow. As a result, the world's largest steelmaker

SES and Intelsat, automotive components maker Delphi, chocolatier Ferrero, tech firms Amazon, PayPal and eBay, as well as RTL Group, the leading European radio and TV broadcaster, and Cargolux, the world's leading all-cargo carrier, have chosen Luxembourg as a location for their global or European headquarters.

Luxembourg is also home to a vibrant and international start-up community. Numerous support measures for start-ups, from incubation to success and acceleration, are available and incubators and co-working spaces offer premises both to newly created firms and to international companies looking for their first foothold in Luxembourg.

As one of the world's leading and most international financial centres, Luxembourg offers excellent access to private financing as well as specific financial vehicles to structure private equity investments. Companies can also benefit from attractive public funding programmes that help them expand their activities and strengthen their competitiveness.

A MAGNET FOR TALENT

Luxembourg has an exceptionally skilled workforce and attracts both talented expats and cross-border commuters. It is one of the most international countries in the world with 48% of the population being non-Luxembourgish. Cross-border thinking, mobility and the cosmopolitan nature of its working population contribute to the country's high productivity. Due to the language skills of the workforce - fluency in three or more languages is the norm rather than the exception companies speak their customers' language, a significant advantage. German, French and Luxembourgish are official languages and English is also widely spoken.

AN INNOVATION LEADER

Encouraging research, development and innovation is a national priority and the country invests heavily in both public and private research. Companies receive backing to help them develop innovative concepts, products and processes. Business-focused public research organisations collaborate with private businesses on R&D, product development

and testing. Founded as recently as 2003, the University of Luxembourg today ranks among the world's top 200 universities.

Innovative activities such as biotechnology, fintech and the data-driven economy thrive in Luxembourg. The country has one of the best digital infrastructures in the world and plays a central role in the European network of highperformance computing currently being put in place.

A CROSS-BORDER SPECIALIST

Luxembourg's excellent air, road, rail and waterway infrastructure and its central location in Europe position the country as a competitive inter-continental logistics hub. Paris is two hours away by high-speed train, and regular flights to London, Barcelona, Zurich and Milan take about 90 minutes. Frankfurt, Brussels and Amsterdam are closer still. 60% of the EU's GDP can be reached by road in less than a day or by air in a couple of hours. With its first-rate infrastructure and well developed international distribution network, Luxembourg is an ideal platform for reaching the European market of more than 500 million consumers.

A GREAT PLACE TO WORK AND LIVE

The national character of openness, dynamism and reliability is also reflected in Luxembourg's long tradition of welcoming foreign nationals and making them feel at home. With almost half of the national population and close to three quarters of the inhabitants of the capital coming from all over the world, a very international culture has developed. Well-respected international schools exist alongside public schools offering studies in Luxembourgish, German and French as well as programmes in English. The country's multinational makeup helps Luxembourg's politicians and entrepreneurs to understand their discussion and negotiation partners more easily and take on a mediation role whenever needed.

When it comes to career prospects, there is a world of opportunities in Luxembourg. The country has been voted a top-ranking place to live and work in multiple international surveys thanks to a stable economy, safe jobs and a generous social security system. Located in the beautiful green heartland of Europe and being exceptionally safe, Luxembourg is also a great place to live, travel and raise a family.

For centuries, the Grand Duchy was the theatre and the object of endless struggles between European powers, which set it up as an impregnable fortress and then dismantled it 200 years later. It has been at the heart of a multitude of cultural influences, partly because of its geography but also because of trade, industrialisation, and immigration. It has protected its woodlands like a treasure, shaped its landscapes with winegrowing, farming, and architecture. It has cultivated linguistic diversity, cultural originality, and economic freedom. From being poor and bled by emigration at the end of the 19th century, it has now become one of the most attractive countries in the world for working and living, and a genuine societal laboratory.

The Grand Duchy leaves no one indifferent, for it has its own place in the concert of nations: a pioneer of economic alliances and partnerships, a modest and persevering mediator, and a nation where everyone feels at home. Since its independence, the country has invented and reinvented itself a thousand times by building on its dynamism, its reliability, and its openness.

It is the breadth of this personality and its multiple facets that we invite you to discover here. Help us to make the Grand Duchy better known and stand out!

SO WHO IS LUXEMBOURG?

A land of optimism

A positive atmosphere, plenty of confidence in the future, and inspiring energy for new projects: newcomers to Luxembourg are struck by the optimistic feel of the place.

The fact that Luxembourg is considered one of the most attractive economies in the world is very much due to its optimistic outlook.

The driving force behind Luxembourg's success emanates from a unique mix of factors. The most cosmopolitan country in Europe, and possibly even in the entire world, is experiencing a remarkable demographic growth. The age structure of the population is particularly young.

Economic growth has been very robust for years. The State invests massively in infrastructure and supports forward-looking initiatives. Foreign capital continues to flow, public-private partnerships are increasing and the number of new innovative businesses and companies choosing to establish themselves in the Grand Duchy is on the rise.

This optimistic attitude is catching. All the ingredients are there for projects to spring up and thrive. All is set for Luxembourg to continue to attract foreign talents and international investments.

Smart Nation

It's a fact that Luxembourg has given a boost to IT infrastructure, the Cloud, Fintech and Biotech. More than that though, the entire society has set out to achieve the title of "Smart Nation", a nation that is multilingual, cosmopolitan, hyperconnected, enterprising and well trained.

Which country in the world was first to embrace Jeremy Rifkin's vision and apply it to its economy and society? The Grand Duchy is an ideal test-bed to combine information technology, renewable sources of energy and smart transport networks.

Who aims to bring Earth closer to the stars? Luxembourg's skills in mining, finance and space place it in a perfect position to work out a suitable legal framework to develop the utilisation of space resources.

Which university has managed to rank as one of the top ten international universities in the world within less than 10 years? Luxembourg's university has set foot in Belval, an amazing site with high-quality infrastructure, aesthetically impressive, and bringing together public and private actors.

Which country in the world masters so many languages, is able to bring together so many

diverse nationalities within the workplace, and provides opportunities for rapid career advancement? Luxembourg cultivates diversity in all its forms and is committed to collective knowledge.

There are endless examples. In today's world, it's not the technical infrastructure alone that matters. It's the qualitative aspects such as social skills that are key and that are highly valued by business. Apply this to an entire country, and an exceptional ecosystem unfolds.

A serene environment

In an increasingly complex and tense world, serenity has become the most valuable resource. If there is one thing everyone in Luxembourg agrees upon, it is that the general feel is positive, both at work and in private.

Luxembourg is a safe bet – now even safer than ever! Not only because of its triple-A rating, but also because of the general working environment. Relations are straightforward and conducive to new projects.

Did you know that Luxembourg has the safest capital city in the world? A capital city where you'd want to raise your family, where children sit side-by-side in the class-room with peers from all over the world, where nature is so close that the forest lies within the city, where you get the chance every day to savour the best dishes of the world.

The firmly-rooted tradition of solidarity in the country is a clear indicator of Luxembourg's open-mindedness. It's a tradition that sets the tone to the country's social policy, which, by the way, is very efficient too.

This attitude also provides the foundation to the generous approach to development cooperation and humanitarian action.

The general sense of calm in society is due above all to the country's culture of consensus that governs professional and personal relations as well as social dialogue.

A State grounded on the rule of law, a wellfunctioning legal system, a service-minded administration. If you add to this infrastructures and IT networks of the highest level, it comes as no surprise that Luxembourg is the safest place in the world to host the most sensitive data centres.

Or quite simply, the best place to live.

A global society

To get a sense of what a "global society" can be, you only need to pay a visit to the Grand Duchy. This most cosmopolitan of countries in the world has succeeded to build an open and invigorating society. It today offers one of the most attractive places in the world to live and to pursue an international career.

"The country where everyone feels at home" could be Luxembourg's motto. Indeed, almost half the population comes from all over the world. This is the case all the more so in Luxembourg City where, at day-time, three quarters of the inhabitants come from another country. This is a very common situation in schools, where children get along together quite naturally and rapidly adopt a very international culture.

While the country has three legally recognised languages (Luxembourgish, French and German), English is widely used. This exceptional

SO WHO IS LUXEMBOURG?

multilingualism has always given Luxembourg's politicians and entrepreneurs an extraordinary ability to understand their interlocutors and to take on a role as mediator in international relations quite naturally. This capacity to look outwards explains why the Grand Duchy has been a founding member of some of the most important international organisations and today still continues to play an important role in them. The ability to adapt lies at the basis of the tolerance that prevails over cultural and religious relations in the country.

A great country

If there's one misunderstanding that irritates Luxembourgers, it's that the rest of the world often assumes that the country is no more than its capital city.

But the Grand Duchy – established by the Congress of Vienna in 1815 on solid, age-old historic foundations – is a fully-fledged country, with a proper territory, plurilingualism and its very own cultural scene, an extraordinary wealth of landscapes, an administrative capital (Luxembourg City), dynamic urban centres in different parts of the country, and a host of delightful villages scattered throughout the countryside.

11

The structure of its economy has developed according to its geographical conditions: agriculture predominates in the north, services and administrations are concentrated in the centre, and the south presents an industrial landscape. Luxembourg is a founder member of all the major international institutions set up after the Second World War (including the United Nations, NATO and the European Union), and takes its share of responsibility in the world.

The proportion of its Gross National Income devoted to development cooperation and humanitarian aid counts amongst the most generous amongst developed countries.

In 2013/2014, Luxembourg had a seat on the United Nations Security Council as a nonpermanent member: not such a small state after all!

Surrounded by nature

Every country likes to pride itself on the charms of its natural landscape, and the Grand Duchy is no exception. And yet, Luxembourg has a few key attributes that are quite exceptional – and unexpected. Luxembourg has managed to preserve its forests, which still today cover more than one third of its territory. The woodlands are ubiquitous, even in the heart of the city, creating a natural setting that is both familiar and magnificent. Even schools and nurseries are located in the forest.

Luxembourg is well aware that its natural surroundings are an asset. Hence, it gives access to its natural treasure by providing extensive cycle tracks and hiking paths throughout the nature reserves and parks. It also protects its ecosystem and cultivates well-being through the quality of both the environment and the local produce.

This geographical and cultural proximity to nature is a binding factor within Luxembourg society. Newcomers usually rapidly adhere to the code.

Even the financial sector and the Luxembourg Stock Exchange are pioneers in this regard. They excel in green investment products and other financial tools for fighting climate change, reaching top of the international rankings.

THE CLUSTERS

SINCE 2002, THE LUXEMBOURG GOVERNMENT HAS ENCOURAGED THE CREATION OF CLUSTERS FOR SECTORS IT CONSIDERS VITAL FOR THE DEVELOPMENT OF THE COUNTRY'S ECONOMY.

This involves fostering a network of private and public players that will create favourable ecosystems for entrepreneurship, technology transfer and innovation.

The Luxembourg Cluster Initiative, which is managed by Luxinnovation (the national innovation agency), covers a wide spectrum of activities:

LUXEMBOURG CLUSTER INITIATIVE

- AutoMobility
- CleanTech
- Creative Industries
- HealthTech
- Materials & Manufacturing
- / Wood

THE PLACE

HOUSE OF STARTUPS

powered by the Luxembourg Chamber of Commerce

Innovation hubs, incubators, business accelerators, and startup consulting services are all under one roof at the House of Startups (HoST).

The House of Startups (HoST) was set up in 2017 by the Luxembourg Chamber of Commerce with the ambition to become a driving force behind the startup and innovation ecosystem in Luxembourg. Its mission is to federate, promote and support the startup ecosystem but also the innovation needs of businesses and other organisations. HoST supports and promotes innovation, the creation of innovative startups and economic growth.

The House of Startups federates a diversified community of innovators under one roof and counts 4 different incubator's, Luxembourg City Incubator (LCI), Le Village by Credit Agricole Luxembourg, Luxembourg House of Financial Technology and the International Climate Finance Accelerator (ICFA) Luxembourg.

The HoST's mission goes beyond the campus and extends to the whole Luxembourg startup and innovation ecosystem through promoting locally & internationally and create a thorough network.

The Luxembourg Open Innovation Club (LOIC) bridges the gap between Luxembourg Corporates and the innovation ecosystem. Steered by more than 30 innovation Directors it enables the implementation of open innovation projects through best practice sharing, working groups and business connections with startups. The EU-Tribe, is the cross-border cooperation network for startups and incubators, accelerations and hubs from the Greater Region bringing together their powers and resources.

The HoST is the place to be for every entrepreneur with a vision.

LUXEMBOURG INSTITUTE OF SCIENCE AND TECHNOLOGY (LIST)

5, Avenue des Hauts-Fourneaux L-4362 LUXEMBOURG

The Luxembourg Institute of Science and Technology (LIST) is a mission-driven Research and Technology Organisation (RTO) that develops competitive and market-oriented product/service prototypes for public and private stakeholders.

With its 600 employees, 75% of whom are researchers or innovation experts from all around the world, LIST is active in the fields of informatics, materials and environment and works across the entire innovation chain: fundamental/applied research, incubation and transfer of technologies.

By transforming scientific knowledge into technologies, smart data and tools, LIST is about empowerment:

- We empower European citizens in their choices
- · We empower public authorities in their decisions
- We empower businesses in their strategies

MOTOR DEVELOPMENT INTERNATIONAL S.A.

17, Rue des Bains L-1212 LUXEMBOURG

Contact:

Mr Christopher COTTYN Communication Officer Ø+352 26 26 26 15 © www.mdi.lu Minfos@mdigroup.eu

With the vision to make sustainability accessible to all, **Motor Development International (MDI)** developed a disruptive clean technology with engines that run on compressed air ideally produced from renewable sources such as solar, wind, or hydro collectors. This technology offers a wide array of applications operable and adaptable to Sustainable Mobility and Energy Storage Solutions. MDI's applications that run on compressed air are ready to be industrialized through a net of microfactories, include:

AirPod 2.0: A urban quadricycle 2 seats, 100 km range.
Industrial train: Wagons with air tractor
Green'Air: An off-road compressed air buggy
Air'Volution: The garbage-collector truck developed with VEOLIA

AirWall: a fixed energy storage solution for buildings ICAESS: Industrial Compressed air Energy Storage Solution

MDI's evolved business model focuses on three facets: Custom manufacturing and marketing of MDI's products based on compressed air engine technology, commercialisation of MDI's manufacturing licenses, and creation of joint ventures.

National Joint Pavilion of the Grand Duchy of Luxembourg

NCR BIOCHEMICAL SÀRL

5, Rue de l'Industrie L-8399 WINDHOF

NCR Biochemical is an international chemical company specialised in water treatment, biotechnology and process additives in papermaking and sugar industries.

With thirty years experience and expertise in pursuing quality, safety and environmental responsibility, we produce the best chemical and biological technologies, find the best solutions for our customers and develop our own dosing systems, following the best way to create value and solutions for our customers.

We are able to satisfy global industries' needs with the flexibility of the local company thanks to a comprehensive scientific approach, which brings benefits and results to our clients.
