Mr. Leoš Mauer – Director, Defence Hub CzechInvest; NATO DIANA Accelerator, Czechia Lead

Ms. Alexandra Miklóssyová – Community Manager, Defence Hub CzechInvest / NATO DIANA Accelerator, Czechia

Capt. Lukáš Jandura – Liaison Customs Officer at Europol, Section 03 – Investigation and Surveillance

Col. Václav Rukner – Justice and Home Affairs Unit, Police of the Czech Republic

Mr. Tomáš Kubín – Innovation and Pilot Projects Specialist, Prison Service of the Czech Republic

CONNECTRONICS s.r.o.

www.connectgroup.com

Connectronics s.r.o., based in Kladno, is the Czech entity of Connect Group, one of Europe's leading EMS providers with over 40 years of experience and international certifications such as AS 9100D. The company is scaling up operations in line with Czechia's growing role in European defence, focusing on avionics and defence through advanced production and testing facilities. It offers specialised services including complex cable harnesses, rugged electronics, and high-value small-batch manufacturing. Applications span avionics, tactical communications, radar, night vision, drones, missile control systems, and rugged power modules. Drawing on Connect Group's aerospace expertise, including work on the Ariane 6 launcher, Connectronics delivers secure, high-performance solutions with full lifecycle support, strengthening Czechia's contribution to Europe's defence and aerospace industries.

CONNECT GROUP

Phonexia s.r.o.

www.phonexia.com

Phonexia is a software company that has been developing cutting-edge technologies for voice biometrics and speech recognition since 2006. Its products are trusted by law enforcement, intelligence services, military, and forensic institutions in over 60 countries. The Phonexia Speech Platform offers a wide range of capabilities, such as speaker, gender, and language identification, speech transcription, and deepfake detection. The Phonexia Voice Inspector is an out-of-the-box tool enabling police and forensic experts to perform highly accurate voice comparison. With flexible on-premises or private cloud deployment, Phonexia keeps your data secure and supports your security and operational needs.

First Green Industries a.s.

www.first.green

First Green Industries a.s. is an innovative technology company specializing in the development and production of fully electric skid steer loaders. We combine high performance, zero emissions, and low operating costs. Our goal is to offer machines capable of handling demanding tasks in construction, demolition, mining, or municipal services—quietly and emission-free. Our flagship model is the Elise 1200, the world's first 100% electric skid steer loader, complemented by the cabinless CBL and Rockeat lines, and compact mini loaders MiniZ and Walleat. All machines are designed with a strong focus on safety, efficiency, and user-friendliness.

Based in the Czech Republic, we operate globally and our machines are used by customers worldwide. In the defence industry we specialize in demining. We offer remotely operated machines for efficient mine clearance in urban areas and surroundings. Thanks to its small size and high manoeuvrability, it easily moves even in the tightest spaces, enhancing safety and efficiency by reducing the need for human presence in hazardous zones. FGI's electric solutions offer strategic advantages such as remote control, teleoperation, low noise, and reduced heat signature.

JISR Institute, a.s.

www.jisr-institute.com

JISR Institute, a.s. is a Czech company specializing in advanced solutions for Joint Intelligence, Surveillance and Reconnaissance (JISR), Electromagnetic Warfare (EW) and Force Protection, with a strong focus on Anti-Drone (C-UAS) and Perimeter Protection. Our systems integrate combat-proven sensors, effectors and Command & Control (C2/C4ISTAR) applications, supporting operations at various levels. Backed by a team of experts with both military and scientific backgrounds, we deliver innovative designs and architectures validated by the Czech Armed Forces and NATO. JISR products have been deployed in real missions with NATO and the United Nations. Long-term cooperation, tailored solutions, training and maintenance form the foundation of our trusted partnerships, further strengthened by organizing a specialized EW & ISR Workshop at NATO HQ in Brussels, partnership with the Czech MOD, leading membership in the DCIA, and active collaboration with international defense entities.

CEC GROUP, s.r.o.

www.cecgr.cz

CEC Group is a leading public affairs agency in Czechia and the Central European region. Our company was originally founded by British and American entrepreneurs who moved to Central Europe. In addition to Czechia, we operate under the CEC brand in Slovakia, Hungary, Estonia and Poland, where we have our largest office. We are a separate legal entity in each of these countries, but together we share the brand, the website, and most importantly the expertise and know-how. In public affairs, we provide a full range of services, from strategic planning and stakeholder management to ongoing monitoring, ad-hoc support, and comprehensive project evaluation, delivering measurable impact and lasting success for our clients. In addition to our core business of public affairs consulting, we also provide strategic communications support, and our analytics team produces in-depth due diligence and investigative reports on companies and individuals. CEC Group is also a proud affiliate and partner of the DGA Network — the world's largest global network of independent public affairs, government relations, and strategic communications firms. The DGA Network unites 28 firms in 58 countries, bringing together more than 800 consultants worldwide.

EO Security s.r.o.

www.eo-security.com

EO Security s.r.o., founded in 2016, is a Czech company specializing in advanced security products. It focuses on Signal Intelligence (SIGINT) and Technical Surveillance Counter Measures (TSCM) to detect and counter modern wireless and cyber threats. With expertise in offensive cybersecurity, we integrate adversarial knowledge into product development. Their flagship platform, EO Spectre, provides passive, offline-capable monitoring of Bluetooth, Wi-Fi, and RF spectrum, delivering real-time intelligence and advanced analytics. Their product range includes Speech Protectors and Jammers to prevent eavesdropping.

FORSOLUTION CZ s.r.o.

www.forsolution.cz

FORSOLUTION CZ s.r.o. is a privately owned company specializing in wireless digital audio surveillance technologies for covert operations. With extensive expertise, the company designs, develops, and manufactures advanced surveillance equipment tailored for police forces, intelligence agencies, special units, and other government-approved organizations worldwide. One of its flagship products, DELTA, is an advanced wireless audio surveillance system designed specifically for covert use. The standard setup includes a 400 mW DELTA transmitter and a corresponding receiver, which enables real-time stereo audio monitoring and remote control of transmitters. The system also offers optional audio recording and IP-based remote access via the DELTA BlackBox receiver, providing flexible and secure deployment in the field.

TACTICAWARE s.r.o.

www.tacticaware.cz

Tacticaware is a well-established Czech manufacturer, proud to present the widely acclaimed volumetric security system HxGN dC3 LidarVision. Through years of dedicated software development, our skilled team has created an exceptional security solution that leverages LiDAR technology in a fully three-dimensional environment. This advanced method of volumetric detection—known as 3D Surveillance—reflects the commitment and expertise of our in-house specialists at Hexagon, setting new standards in the security industry.
