3	ELENEX	<p>Hydroelectric Power Stations, Solar Power Stations, Wind Power Stations</p>
4	ENERGY STRYM	<p>Import of liquefied gas</p> <p>The Company has been established in UAE in the year 2014 and actually operates based on the license N 5020165 dated 11 October 2018 (extended till 10 October 2023). The license was issued by RAS Al Khaimah Emirate's government. The mentioned type of license permits trading only in fuel markets. The Company trades with Liquid Petroleum Gas (LPG) only. The mentioned license provides exemption from any type of business taxes existing in UAE.</p> <p>The main reason for establishing the Company outside Armenia was the fact that the Company actually operates outside Armenia. The countries where the Company purchases LPG (Iraq and Iran) do not have developed legal and regulatory systems or do not provide smooth operating opportunities for foreign companies. The research of legal and tax systems of several countries, like Georgia, UK and Russia, by the Company owner revealed that it is mostly advantageous from economic point of view and easy to administer a company established in UAE.</p> <p>Actually, the Company purchases the LPG from Iran or Iraq and supplies it to Armenian companies or other companies operating in Armenia. The ownership of LPG passes to the buyer before arriving onto Armenia, hence is customs cleared by the buyer.</p>
