

# WAVES<sup>®</sup>

## SMP Sustainability Management Platform

Luxembourg-based company since 2019 with the vision of making sustainability visible and manageable using human expertise, digitalization and AI

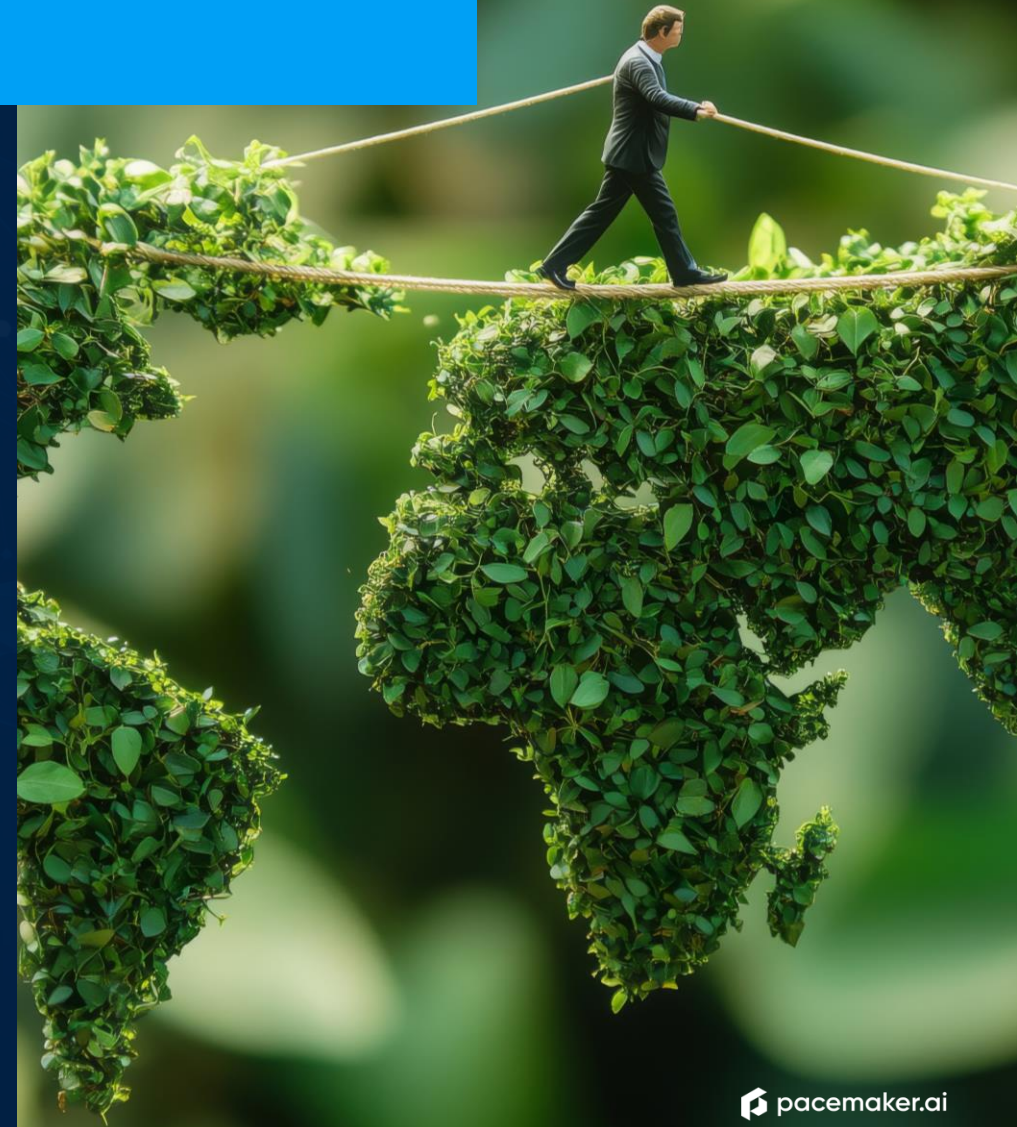

April 2025

# If done right, we talk about Sustainability MANAGEMENT

## ...and not just REPORTING!

The  
**Ring of Resilience**  
creates  
opportunities  
which outweigh  
the costs of  
sustainability

# The all-in-one software platform for sustainability management

The modular WAVES® Sustainability Management Platform (SMP) enables companies with the 360° management of all sustainability-related aspects as well as the precise calculation and presentation of all ESG indicators (Environmental Social Governance) relevant for CSRD reporting.

**Everything at a glance**  
Easy to use with many help functions, even suitable for non-experts.

**Verified data, certified methods**  
Verified calculation of sustainability indicators through certified methods.

**Easy & intuitive use**  
Offers a comprehensive overview of all topics relevant to sustainability and their presentation in clear dashboards.

Five powerful modules for corporate sustainability management

ERP-Systems

Logistics data

Emission data

CSRD

EU-Taxonomy

Corporate Carbon Footprint

Product Carbon Footprint

Transport Emissions

Create automated CSRD reports from the materiality analysis to the finished report according to ESRS specifications.

Assess the share of sustainability of economic activities according to the EU-Taxonomy as part of the CSRD report.

Calculate TÜV-certified Corporate Carbon Footprints in Scopes 1-3.

Create scalable, AI-based Product Carbon Footprint (PCF) calculations to map all product portfolios.

Calculate TÜV-certified CO<sub>2</sub> emissions in transports and logistics, in real-time down to shipment level.
