Taux de croissance	4.9% (2019 est.)
IHD	43
Capitale	Budapest

Introduction

Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU five years later.

Indicateurs macroéconomiques

Economic growth is projected to remain strong but to slow somewhat in 2019 as capacity constraints bite. Real wage gains and employment increases will support private consumption, while investment will be stimulated by private firms and the disbursement of EU structural funds. Exports will benefit from robust external demand and new capacity expansion, although gains in market share will slow. Wage increases resulting from tighter labour market conditions will raise inflation, which is projected to exceed the central bank's 3% target in early 2019.

Fiscal and monetary policies are expansionary. In 2018, there have been tax reductions alongside widespread spending increases. Statutory minimum wages have also been raised sharply, with further increases scheduled. Prudent policies are needed to prevent overheating. Furthermore, with strong economic growth, a faster reduction of the budget deficit would allow the government to finance higher future age-related spending.

Country risk as defined by Office du Ducroire for Hungary

Ducroire is the only credit insurer covering open account deals in over 200 countries. A rating on a scale from 1 to 7 shows the intensity of the political risk. Category 1 comprises countries with the lowest political risk and category 7 countries with the highest. Macroeconomics experts also assess the repayment climate for all buyers in a country.
