PIB	\$315.6 billion (2017 est.)
Taux de croissance	3.1% (2017 est.)
IHD	19
Capitale	Jerusalem

Introduction

The State of Israel was declared in 1948, after Britain withdrew from its mandate of Palestine, the UN proposed partitioning the area into Arab and Jewish states, and Arab armies that rejected the UN plan were defeated. Israel was admitted as a member of the UN in 1949 and saw rapid population growth, primarily due to migration from Europe and the Middle East, over the following years. Israel fought wars against its Arab neighbors in 1967 and 1973, followed by peace treaties with Egypt in 1979 and Jordan in 1994. Israel and Palestinian officials signed a number of interim agreements in the 1990s that created an interim period of Palestinian self-rule in the West Bank and Gaza Strip, which Israel occupied in 1967. The most recent effort to negotiate final status issues took place in 2013-2014. Immigration to Israel continues, with 28,600 new immigrants, mostly Jewish, in 2016. The Israeli economy has undergone a dramatic transformation in the last 25 years, led by cutting-edge, high-tech sectors. Offshore gas discoveries in the Mediterranean, most notably in the Tamar and Leviathan gas fields, place Israel at the center of a potential regional natural gas market. However, longer-term structural issues such as low labor force participation among minority populations, low workforce productivity, high costs for housing and consumer staples, and a lack of competition, remain a concern for many Israelis and an important consideration for Israeli politicians. Prime Minister Benjamin NETANYAHU has led the Israeli Government since 2009; he formed the current center-right coalition following the 2015 elections.

Indicateurs macroéconomiques

Growth is projected to strengthen to over 3½ per cent in 2018 and 2019. Support from fiscal easing, very low interest rates and a stronger external environment will boost demand and employment. In a tight labour market, rising wage pressures are projected to lead to a steady increase in inflation.

The monetary authorities must stand ready to gradually raise interest rates once inflation is sustainably back in the 1-3% targeted range. Higher social spending and expenditure on education and health care are welcome to foster more inclusive growth. The financing of these expenses with sufficient revenues would preserve budgetary room for manoeuvre and lower the risk of overheating. Reducing the existing large social disparities will be beneficial for growth, but will also require intensifying structural reforms that improve the skills and productivity of disadvantaged groups.

Country risk as defined by Office du Ducroire for Israel

Ducroire is the only credit insurer covering open account deals in over 200 countries. A rating on a scale from 1 to 7 shows the intensity of the political risk. Category 1 comprises countries with the lowest political risk and category 7 countries with the highest. Macroeconomics experts also assess the repayment climate for all buyers in a country.

Luxembourg for Business market entry guide to Israel: Market entry guides are brochure series published by the Ministry of the Economy and Foreign. The series focuses on worldwide markets, industries and business environments, providing comprehensive and in-depth analysis and guidelines. The brochures cover all aspects relating to a market entry including the economic, financial and legal frameworks. The brochures are a vast knowledge pool, compiled into a practice oriented document with many tips and important addresses.
